Black Print File Setup

To ensure your printed black appears as a true, rich black, all areas intended to print black must be built as a spot color named “Rich Black”

Two-Sided Graphics File Setup

(3 images needed or use our pre-press designer)

1st Image will be reversed or
2nd surface view

2nd Image should be a black
layer to blackout

3rd Image will be normal view
with bleed and cutlines.
