

Perforated window film offer one-way viewing of vibrant imagery while maintaining the ability to see out of the window.

## Trendfilm 2C 60/40

60% printable area, 40% hole area. Offers a good balance between visibility and printed graphics.

*Best For: Storefronts, vehicle windows, where you want to maintain a clear view from inside with detailed graphics outside.*

## Trendfilm 2C 70/30

70% printable area, 30% hole area. More space for graphics, with less visibility from inside.

*Best For: Displays where showcasing vibrant, high impact graphics is more important than maintaining clear inside visibility.*

**Choose the 60/40 pattern for a better balance of visibility and graphics, and the 70/30 pattern when you want more focus on the printed design.**

Our TRENDFILM 2C is a perforated window film. Made with special PVC, white gloss with black backing for use on substrates such as glass. Provides added security and privacy

- Durability: Up to 2 years
- Adhesive: Solvent polyacrylate
- Printability: Standard solvent and mild-solvent inks
- Backing: One side silicone
- Removability: Clean-removing for up to 6 months
